

Journal of Semantics: New Editorial Directions

1. Editors and Advisory Board

As of July 1st, 2009, a new editorial team will be in charge of *Journal of Semantics*.

Managing Editor

Philippe Schlenker (Institut Jean-Nicod, Paris; New York University)

Associate Editors

Danny Fox (Massachusetts Institute of Technology)

Manfred Krifka (Humboldt University Berlin; ZAS, Berlin)

Rick Nouwen (Utrecht University)

Robert van Rooij (University of Amsterdam)

Yael Sharvit (University of Connecticut)

Jesse Snedeker (Harvard University)

Zoltán Gendler Szabó (Yale University)

Anna Szabolcsi (New York University)

We are very grateful to the previous editorial team for its work, and we are honored that Bart Geurts, the former Managing Editor, has agreed to set up and head a new Advisory Board:

Advisory Board

Gennaro Chierchia (Harvard University)

Bart Geurts (University of Nijmegen)

Lila Gleitman (University of Pennsylvania)

Irene Heim (Massachusetts Institute of Technology)

Laurence R. Horn (Yale University)

Beth Levin (Stanford University)

Barbara Partee (University of Massachusetts, Amherst)

François Recanati (Institut Jean-Nicod, Paris)

Roger Schwarzschild (Rutgers University)

Arnim von Stechow (University of Tübingen)

Thomas Ede Zimmermann (University of Frankfurt)

The new Editorial Board appears at the end of this announcement.

2. Editorial Policy

Scope

Journal of Semantics aims to be the premier generalist journal in semantics. It covers *all* areas in the study of meaning, and particularly welcomes submissions using the best available methodologies in semantics, pragmatics, the syntax/semantics interface, cross-linguistic semantics, experimental studies of meaning (processing, acquisition, neurolinguistics), and semantically informed philosophy of language.

Types of articles

Journal of Semantics welcomes all types of research articles – with the usual proviso that length must be justified by scientific value. Besides standard articles, the Journal will welcome ‘squibs’, i.e. very short empirical or theoretical contributions that make a pointed argument. In exceptional circumstances, and upon the advice of the head of the Advisory Board, the Journal will publish ‘featured articles’, i.e. pieces that we take to make extraordinary contributions to the field.

Editorial decisions within 10 weeks

Informed by past experience, the Journal has set itself the goal of making editorial decisions within 10 weeks of submission.

Refereeing

Articles can only be accepted upon the advice of anonymous referees, who are asked to uphold strict scientific standards. Authors may include their names on their manuscripts, but they need not do so. (To avoid conflicts of interest, any manuscript submitted by one of the Editors will be handled by the head of the Advisory Board, who will be responsible for selecting referees and making an editorial decision).

Submissions

All submissions are handled electronically. Manuscripts should be emailed to the Managing Editor [managing.editor.js@gmail.com], who will forward them to one of the Editors. The latter will be responsible for selecting referees and making an editorial decision. Receipt of a submission is systematically confirmed.

3. Editorial Board

Maria Aloni, University of Amsterdam
Pranav Anand, University of California, Santa Cruz
Nicholas Asher, IRIT, Toulouse; University of
Texas at Austin
Chris Barker, New York University
Sigrid Beck, University of Tübingen
